- One dome light with switch
- 3500# axles (Single on 8'-12' lengths; Tandem on 14'-18' lengths)

Bumper Pull Rec/Utility Trailer Model 1610

FEATURE

FUNCTION

BENEFIT

All-Aluminum Construction

Featherlites are made with an all-aluminum frame and skin.

With just routine maintenance, aluminum construction has higher resistance to rust and corrosion and in the long run, they hold their value longer. It's also lighter weight, increasing your payload capacity and making for a smoother tow.

Featherlite Advantage Flooring

Model 1610 includes the Featherlite Advantage wood flooring standard.

The Advantage wood floor is sturdy and moisture resistant; it won't soak up water or warp like untreated plywood can. The floor has a thermally fused protective liner underneath to better protect the cargo.

Uni-Body Design

All components of the Featherlite trailer from side posts to roof rails to roof bows to cross members are engineered into a uni-body design.

The uni-body design makes the trailer stronger and more durable for the long haul. It also gives you the smoothest pull possible.

Wiring Harness

One-piece wiring harness is standard.

With Featherlite trailers, all wires are bundled in a protective jacket, known as the Featherlite wiring harness. Wire harnesses provide a watertight seal, protect against wire wear and tear and make connecting them to your vehicle easy. Without the harness, the individual wires would hang loose and unprotected.

Roof Rail

2" roof rail standard.

You'll find a sturdy 2" radius aluminum roof rail on Featherlite's enclosed aluminum cargo trailers. The roof rail is strong plus looks great too.

For full array of floorplans, visit www.ftth.com.

*On most new 2014 models beginning on October 4, 2013 and thereafter. 10-year limited structural warranty on frame and superstructure. 3-year limited warranty on all other parts manufactured and installed by Featherlite. Some exclusions apply. See website or dealer for details. Trailer may be shown with options.
