Gooseneck Horse Trailer Model 8541

FEATURE	FUNCTION	BENEFIT
All-Aluminum Construction	Featherlites are made with an all-aluminum frame and skin.	With just routine maintenance, aluminum construction has higher resistance to rust and corrosion and in the long run, they hold their value longer. It's also lighter weight, increasing your payload capacity and making for a smoother tow.
Uni-Body Design	All components of the Featherlite trailer from side posts to roof rails to roof bows to cross members are engineered into a uni-body design.	The uni-body design makes the trailer stronger and more durable for the long haul.
White Lining	White lining on walls above rubber & on ceiling standard. Also includes insulation.	White lining creates a brighter interior for horses during loading & travel, keeping them calmer. It also gives the trailer a cleaner, more eye-appealing interior.
Light 'Flo' Drop Down Feed Doors	One Light 'Flo' drop down feed door in front of each horse is standard.	Featherlite's Light 'Flo' drop down feed doors allow up to 90% more airflow and light into the horse area, helping keep horses more calm and relaxed while loading and traveling. With their lowered handle, they are also easier to operate.
3/4" Rubber Floor Mats	3/4" rubber floor mats are standard in the horse area.	The thickness of Featherlite's floor mats give horses the greatest amount of comfort and stability during travel, reducing stress and potential injury to the horse.
.040 Aluminum & 'Wave' Side Panels	Exterior includes .040 aluminum sheets with 'wave' side panels at the bottom.	Thick .040 sheets offer more strength & durability. 'Wave' sides offer sleek design to exterior.

For full array of floorplans, visit www.fttr.com.

*On most new 2014 models beginning on October 4, 2013 and thereafter. 10-year limited structural warranty on frame and superstructure. 3-year limited warranty on all other parts manufactured and installed by Featherlite. Some exclusions apply. See website or dealer for details.
