- 12" aluminum main I-beams
- 4" extruded aluminum I-beam crossmembers on 18" centers
- 35" floor height
- Two 7000# rubber torsion axles with electric brakes

## Flatbed Trailer Model 1585

FEATURE	FUNCTION	BENEFIT
<b>All-Aluminum Construction</b>	Featherlites are made with an all-aluminum frame and skin.	With just routine maintenance, aluminum construction has higher resistance to rust and corrosion and in the long run, they hold their value longer. It's also lighter weight, increasing your payload capacity and making for a smoother tow.
<b>4" Extruded Aluminum I-beam Crossmembers on 18" Centers</b>	Extruded aluminum I-beams run every 18" under the trailer	Featherlites have a solid support system underneath the trailer for your heavy loads of cargo.
<b>LED Lights</b>	Most lengths come with 13 round clearance lights and 4 stop/turn lights.	LED lights give trailers more visibility when traveling down the road at night. LED lights also use less energy and last longer than conventional lighting.
<b>7K Axles</b>	Tandem 7000# axles are standard with the option up to 12,000# axles.	With the option up to 12K axles, you have a larger payload capacity to haul heavy loads of cargo.
<b>E-Z Lube Axles</b>	Trailer comes standard with E-Z Lube axles.	The E-Z Lube axles make bearing lubrication quick and easy with an E-Z Lube cap that allows for easy access, extra protection and virtually no mess.
