## Bumper Pull Horse Trailer Model 9652

FEATURE	FUNCTION	BENEFIT
<b>All-Aluminum Construction</b>	Featherlites are made with an all-aluminum frame and skin.	With just routine maintenance, aluminum construction has higher resistance to rust and corrosion and in the long run, they hold their value longer. It's also lighter weight, increasing your payload capacity and making for a smoother tow.
<b>Uni-Body Design</b>	All components of the Featherlite trailer from side posts to roof rails to roof bows to cross members are engineered into a uni-body design.	The uni-body design makes the trailer stronger and more durable for the long haul.
<b>White Lining</b>	White lining on walls above rubber & up to ceiling standard.	White lining creates a brighter interior for horses during loading & travel, keeping them calmer. It also gives the trailer a cleaner, more eye-appealing interior.
<b>3/4" Rubber Floor Mats</b>	3/4" rubber floor mats are standard in the horse area.	The thickness of Featherlite's floor mats give horses the greatest amount of comfort and stability during travel, reducing stress and potential injury to the horse.
<b>Aerodynamic Nose</b>	Featherlite bumper pulls feature standard aerodynamic noses.	Better aerodynamics during hauling creates a smoother tow.
