Gooseneck Horse Trailer Model 9751

FEATURE	FUNCTION	BENEFIT
All-Aluminum Construction	Featherlites are made with an all-aluminum frame and skin.	With just routine maintenance, aluminum construction has higher resistance to rust and corrosion and in the long run, they hold their value longer. It's also lighter weight, increasing your payload capacity and making for a smoother tow.
Uni-Body Design	All components of the Featherlite trailer from side posts to roof rails to roof bows to cross members are engineered into a uni-body design.	The uni-body design makes the trailer stronger and more durable for the long haul.
Aluminum Side Panels	Exterior includes extruded aluminum side panels with top air spaces.	The interlocking extruded side panel design offers strength and durability to the trailer. The sleek design of the side panels also dynamically enhances the trailer's exterior appearance.
3/4" Rubber Floor Mats	3/4" rubber floor mats are standard in the horse area.	The thickness of Featherlite's floor mats give horses the greatest amount of comfort and stability during travel, reducing stress and potential injury to the horse.
Slam Latch Dividers	Slant stall dividers with spring-loaded slam latch are standard.	Featherlite's patented spring-loaded slam latch dividers offer a quick and secure lock, with no need for hands near the fastening point. With the dividers properly secured, they won't swing about while traveling, potentially injuring your horse.

For full array of floorplans, visit www.fthr.com

*10-year limited structural warranty on frame and superstructure. 1-year limited warranty on all other parts manufactured and installed by Featherlite.
